- Hinged Doors
- Turnstiles
- Boom Barriers
- Gate Operators

Sectional Doors :

nuCON's sectional doors are top-of-the-line high R-Value doors, designed exclusively for the Commercial and Industrial sectional overhead door market. It is constructed using foamed-in-place polyurethane insulation which creates a strong monolithic panel that is energy efficient. Each Model is secured with standard 14-gauge, galvanized steel hinges. The interior skin of each section has two continuous horizontal 20-gauge reinforcing strips. The section joint is thermally broken and chemically bonded with a pressure-sensitive adhesive sealant. An EPDM rubber weather seal further enhances the performance of the joint.

Rolling Shutters :

On the other hand, nuCON also specializes in providing traditional Rolling Shutter solutions for various industrial and commercial buildings. These rolling shutters offer a versatile and sturdy solution, which is suitable for customers from all industries, with reliable design which would withstand high wind loads.

Hangar Doors :

nuCON has also started marketing Hangar doors which adhere to global standards. The dedicated design team at our principals would help in designing, engineering and manufacturing these doors for our customers.

Hinged Doors :

nuCON offers planners and developers a wide range of products of modern fire-resistant and multi-purpose doors. Our strengths include integrated property solutions, for which we offer innovative doors that are proven in practice.

We are associated with Europe's leading system providers of doors and frames, and our products are manufactured using latest technologies.

Our products not only meet very high standards of quality; we also combine extensive functionality with attractive design.
